Capacity:	bis zu 98 Teile (ohne Haube)
Payload:	46
Weight:	9 kg
Width:	470 mm
Depth:	470 mm
Height:	650 mm

Similar to illustration, technical modifications reserved. Without decoration.

Cup dispenser for installation into a worktop, for storing three to eight stacks of round \varnothing 3.9-5.9" (100-150 mm) cups, glasses and mugs in one stacking compartment.

Dispenser in robust and hygienic design, made of high-quality stainless steel. Design for installation from above without shelf frame. Stacking compartment with stainless steel stacking platform and inner compartment panelling made of anodised-aluminium perforated plate to prevent crockery discolourations. Consistent output height thanks to manually adjustable stainless steel tension spring system. Easy cleaning of stacking compartment from above and via a cleaning opening in the base plate.

The Hupfer incounter plate dispenser EBR-TAS 100/150 is used to save space when storing and handing out cups, glasses and mugs without using baskets by means of three to eight self-guided stacks on one stacking platform. The use of non-rusting stainless steel springs that are easy to insert and remove results in optimal adjustment options for different loads.
