

Cooling plate with handle holes

P/N: 0163959 | A-GS/N28 1000/600

Technical data

Weight:	3.3 kg
Width:	656 mm
Depth:	182 mm
Height:	34 mm

Similar to illustration, technical modifications reserved. Without decoration.

Solid shelf, polished galvanised, made of 0.04" (1.0 mm) thick and corrosion-resistant sheet steel, with burr-free cutting edges, folded and rebated inwards by 1.6" (40 mm) at the long side and by 1.2" (30 mm) at the face side.

Plate in hygienic and food-safe design made of high-quality light grey polypropylen, resistant to typical kitchen detergents and disinfectants, filled with coolant that is harmless to health and the environment. Three handle openings on the narrow sides for secure grip. Keeps its shape during freezing and thawing as well as during cleaning in the dishwasher up to 95 °C. The necessary cooling temperature is at least -15 °C with a minimum cooling time of 18 h. Note: the cold storage plate must be completely frozen through in order to become fully efficient. Any liquid in the cooling brine considerably reduces its performance.
