Enclosed platform dispenser with platform suspended on springs for holding rectangular porcelain standard plastic lids.

Dispenser in self-supporting and hygienic design made of high-quality stainless steel. Enclosed, smooth outer housing with a stacking compartment including inner panelling of vertical, plastic-coated struts. Removable platform made of high-quality perforated stainless steel with ball bearing platform design. Optimised crockery guide with raised trim that runs all the way round the stacking compartment with reinforced stacking corners. Consistent dispensing height due to manually adjustable system of stainless steel tension springs. Easy cleaning of the stacking compartment from above. Four solid polymer corner bumpers at the bottom, and two on the top of the body with integrated, ergonomically designed push handles, for all-round collision protection of the device and walls. Mobile dispenser with 4 swivel castors, including 2 with total brakes, \varnothing 125 mm, secured with multiple bolted screw-on panels.

The Hupfer platform dispenser for lids BPN 4-D is used to store and transport porcelain standard plastic lids without the use of baskets. The two push handles installed on the corners of the unit ensure optimal handling properties. The ergonomically shaped push handles also guarantee effective protection against injuries to the hands.
