Technical data

Modular dimension:	115 mm
Insertion type:	Lengthwise insertion
Payload:	100 kg
Width:	962 mm
Depth:	722 mm
Height:	1591 mm

Similar to illustration, technical modifications reserved. Without decoration.

Insulated cart for transporting food on trays

Fully enclosed, double-wall insulated stainless steel transport cart. The design and materials are chosen to ensure many years of hard daily use. Smooth surfaces on the outside and inside of the cart allow hygienic cleaning. All-round polymer bumper strips on the chassis and roof effectively protect the cart from damage. DIN-quality wheels and four push bars enable easy handling of the cart. Well-sealed doors and completely insulated housing ensure that the cold chain is maintained and HACCP temperature requirements are met. With a wide range of equipment options, the cart can be adapted to individual requirements.
