The stainless steel washing basket for ENT instruments is used for the hygienic cleaning and storage of medical devices.

The fine-mesh washing basket for ENT instruments made of high-quality stainless steel is designed for the hygienic cleaning and safe storage of medical devices. The Hupfer washing basket for ENT instruments is the premium solution for professional and reliable instrument care. The construction from electrolytically polished stainless steel round material is high-quality and durable. The wall made of finely perforated sheet metal protects while also allowing for reliable cleaning of the medical devices. The removable lid made of welded mesh with a twist lock enables good accessibility and easy handling. A separately lockable washing basket for small parts and the rubber instrument holder inside the basket ensure increased protection and secure hold of all devices and smallest accessories during the cleaning process.

- Electrolytically polished stainless steel guarantees quality and durability
- Finely perforated sheet metal protects and allows for reliable cleaning of the devices
- Cover with a screw closure enables good accessibility and easy handling
- Separate washing basket provides protection and support for even the smallest accessories
