

## Sink unit

P/N: 7503860 | ST AH600 2FT-S 2B 2100/700/900

**HUPFER**  
we make work flow

### Technical data

<b>Payload:</b>	150 kg
<b>Weight:</b>	175 kg
<b>Width:</b>	2100 mm
<b>Depth:</b>	700 mm
<b>Height:</b>	900 mm

*Similar to illustration, technical modifications reserved. Without decoration.*

The sink is used for the pre-cleaning of medical instruments.

The freestanding sink table made of high-quality stainless steel is designed for the thorough pre-cleaning of medical instruments. The Hupfer sink table is a central component in hospitals, laboratories, practices, and other medical fields. The welded, open frame construction made of stainless steel square tubing is torsionally rigid and robust. The all-round bending and rear upstand of the washing and working surface ensure easy cleaning and perfect hygiene. The underlay of the working surface provides vibration-free stability and dampens possible operational noise. Height-adjustable plastic feet allow for compensation of potential floor unevenness and ensure a secure stand. A loosely hung and removable lower wire mesh shelf serves as a convenient storage area and ensures good ventilation and quick drying of the stored items. The sink table is available with one, two, or three sinks in different sizes and optional cabinet bases. For individual, specific requirements such as hollow instruments, various fittings and spray heads with water or air pressure are available.

- Welded construction ensures torsional rigidity and robustness - Padding of the wash and work surfaces ensures vibration-free stability and dampened working noises - All-round edging guarantees easy cleaning and perfect hygiene - Height-adjustable feet allow for compensating potential floor unevenness and provide a secure stand - Additional options allow for expansion and adaptation to individual requirements
