

# Stationary shelving set norm 12 with louvred shelf

**HUPFER**  
we make work flow

## Technical data

<b>Max. bay load</b>	100
<b>Max. section load</b>	600
<b>Weight:</b>	27.115 kg
<b>Width:</b>	2075 mm
<b>Depth:</b>	400 mm
<b>Height:</b>	1400 mm

*Similar to illustration, technical modifications reserved. Without decoration.*

The stationary shelving is designed for storage and to optimise space utilisation. The shelving has a high load capacity and is suitable for use at an ambient temperature of  $-30^{\circ}\text{C}$ . The louvred shelf, made from polymer, of the shelving norm 12 provides a ventilated, stable and hygienic storage surface. The set contains 4 shelves per shelf section.

The Hupfer Norm 12 stationary shelving is a lightweight structure made from a combination of aluminium and polymer. The shelving offers a clearly arranged and easily accessible storage solution for organised logistics.

The modular design allows for a needs-specific layout for a wide variety of spatial and temperature conditions, thereby ensuring the most efficient use of space. Uneven floors and temperatures from  $-30^{\circ}\text{C}$  are no problem, even on a permanent basis. The shelving is easy to assemble and can be extended at any time in a straight line or even around corners and is easily adapted to changes in everyday logistics.

The easy-to-install, louvred shelf provides a ventilated, stable and very easy to clean shelf surface. It is even dishwasher safe. This shelf holds heavy loads despite its light weight.

The materials used are sustainable, 100% recyclable, and so valuable that Hupfer guarantees that it will buy back all of your shelving at the end of its useful life.

- solid polymer shelf with low weight ensures ventilated, safe and hygienic

## Stationary shelving set norm 12 with louvred shelf

**HUPFER**  
we make work flow

- storage and keeps the stored goods in peak condition
- high-quality polymer workmanship allows for easy cleaning and perfect hygiene. It is even dishwasher safe.
- modular system allows for any design and extension and ensures the most efficient use of space
- valuable materials ensure sustainability and value retention
- robust construction guarantees high stability and high load-bearing capacity
- modular system ensures easy handling from assembly to cleaning with little effort
