DA VINCI® PERFECTLY PROTECTED

The Hupfer logistics system for da Vinci®
- tailor-made protection for your valuable
da Vinci® optics and instruments.

PERFECTLY MATCHED

The Hupfer logistics system for da Vinci® is perfectly coordinated and optimises your process chain.

Da Vinci® optics and instruments provide surgeons with enhanced depth perception and control thanks to a precise, three-dimensional view of the area being operated on. This makes it extremely important not to expose sensitive devices to unnecessary risks by using makeshift transport and storage solutions in the preparatory logistics.

With the logistics system for da Vinci® specially developed by Hupfer, you can now ensure safe and reliable protection of your high-quality optics and instruments. Treat your valuable resources with the care they deserve.

THE 3-3-6 FORMULA

3

Sterile goods baskets are usually required for an operation

⋮

3

Sterile goods baskets can be moved with a transport cart

⋮

6

Sterile goods baskets can be stored in a shelving section

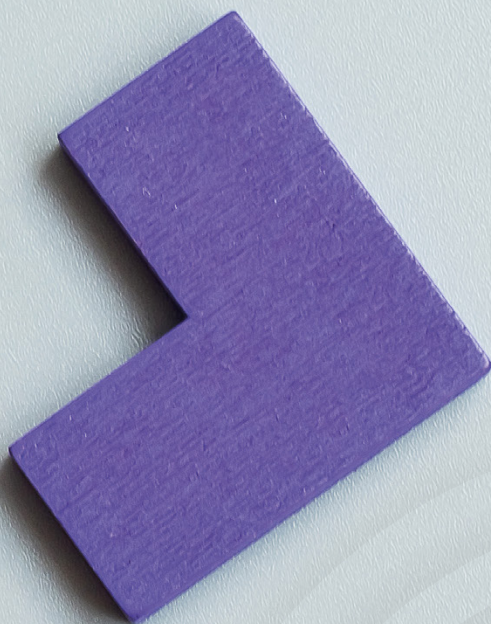

MEDIDUL SHELVING SET FOR DA VINCI®

Product code of basic shelving unit 7506522
(Including drawer frame sets without baskets)

Product code of extension unit 7506523
(Including drawer frame sets without baskets)

THREE PRODUCTS – ONE SYSTEM

The new Hupfer logistics system for da Vinci® consists of three optimally coordinated products, which in turn are perfectly adapted to da Vinci® optics and instruments. This ensures smooth preparation. You take care of the surgery – the Hupfer logistics system for da Vinci® takes care of the rest...

STERILE GOODS BASKET FOR DA VINCI®

Product code 7501979

TRANSPORT CART FOR DA VINCI®

Product code 7506498 (including drawer frame sets)

THE SYSTEM IN DETAIL

1. TRANSPORT CART FOR DA VINCI®

Everything for the operation on board: The Hupfer transport cart for da Vinci®

Previous transport solutions for da Vinci® baskets were unreliable and inefficient, as standard carts did not provide secure fastening and protection for the valuable instruments.

This is why Hupfer developed a transport cart optimised for da Vinci® products. It holds three da Vinci® sterile goods baskets, protects easily damaged soft packaging and increases efficiency in the logistics process.

The advantages of the transport cart for da Vinci®:

- Everything required for the surgery in one cart
- Robotic instruments kept separate from normal instruments
- Made-to-measure design for transporting the contents safely

With drawer frame set for especially ergonomic loading/unloading.

With the transport latch that is included, the da Vinci® instruments can also be transported safely off the premises.

The standard stainless steel paper clamp ensures order and clarity.

The status indicator shows at a glance whether sterile or non-sterile instruments are being transported.

2. STERILE GOODS BASKET FOR DA VINCI®

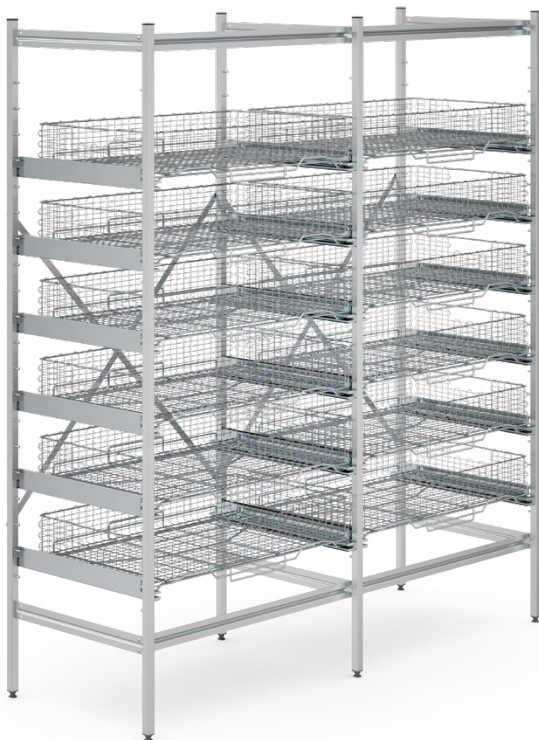

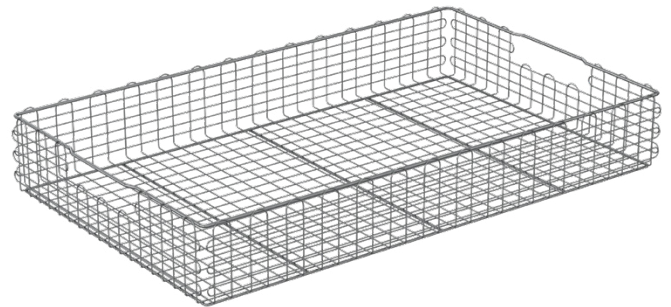

Maximise the life of your da Vinci® optics and instruments

Da Vinci® baskets require special protection during storage and transport. Unsecured storage increases the risk of perforations – an avoidable risk that results in unnecessary additional preparation and associated costs. With the sterile goods basket for da Vinci®, Hupfer offers a special solution that reliably minimises risks and thus actively reduces costs.

Avoid unnecessary preparation work and maintain the integrity of your valuable instruments for maximum efficiency and safety in the operating theatre.

The advantages of the sterile goods basket for da Vinci®:

- Organised storage by optimisation for da Vinci® baskets
- Effective protection of soft packaging avoids unnecessary preparation cycles
- Stackable for even more efficient (temporary) storage
- Side handle openings for maximum comfort
- Suitable for all generations of da Vinci® equipment

3. MEDIDUL SHELVING SET FOR DA VINCI®

Optimise your storage space with the Medidul shelving system for da Vinci®

Standard shelves waste a lot of space when storing da Vinci® optics and instruments. With the optimised format of the Medidul shelving system from Hupfer for da Vinci®, you can overcome the limits of standard shelves with a solution specially developed for these precision instruments. Organise your storage efficiently and make the best use of space.

Our system will forever change the way you save space and keep things ordered.

The advantages of the Medidul shelving system for da Vinci®:

- Efficient storage of da Vinci® sterile goods baskets
- Seamless integration into existing Medidul shelving systems

Equipped with ergonomic drawer frame sets as standard.
