

Product

Hot-Cold-Plate GN-1/1, with sinterceramic, with cooling unit, built-in

Hot and cold plate for the presentation and serving of hot and cold food. Hot-Cold-Plate for installation in a counter or mobile bain marie.

Features		
Time-saving		Fast switching speeds from cold to warm and warm to cold.
Flexible		Versatile use in the action area due to cold and warm temperatures.
Temperature-safe		Digital temperature setting accurate to the degree.
Future-proof		Refrigerant R290 according to EU F-Gas Regulation (517/2014/EU).
Usage & Capacity		
Capacity Usable width Usable depth Max. load capacity Temperature range	mm mm kg °C	1x GN-1/1 330 530 9 - 5° C bis + 140° C
Equipment		
Construction Design		Unit in stable, self-supporting and hygienic construction made of high-quality stainless steel. A cold-warm plate with cover plate is integrated into the cover, which provides optimum temperature distribution due to its excellent conductivity.
Surface		with sinterceramic
Technical features		
Heating technology Heat generation Heating capacity	W	Self-regulating PTC heating elements with short heat-up phase and constant linear temperature curve. 1840
Cooling technology Cooling technology Refrigerant Refrigerant, quantity Cooling capacity Air flow for supply & exhaust air	g W m³/h	Compressor cooling technology R290 150 340 240
Control Position Control operation Temperature range Connection		Unit control on a stainless steel panel for installation in an on-site installation compartment or a separately tendered heat/light gantry. Operating and control unit with digital temperature display, main switch (on/off, cold/warm) and buttons for setting the target temperature. - 5° C bis + 140° C Control unit supplied loose with 1.8m connection cable.

Technical Data

Dimensions (approx.) Width		220
Depth	mm mm	330 530
Height	mm	200
Teight		200
Weight & load capacity (approx.)		
Weight, net	kg	20
5,	5	
Electrical connection		
Electrical voltage	V	230
Electrical connected load	W	1840
Nominal current	Α	8
Frequency	Hz	50 - 60
Protection class		IPX3 (in installed condition)
Cleaning		
0		
Permissible cleaning methods		
Manual cleaning		Suitable for manual, damp wipe cleaning. Smooth surfaces on the outside ensure
		easy and hygienic cleaning.
Permissible cleaning agents		Suitable for commercially available, grease-dissolving cleaning agents. Use
		according to the instructions of the cleaning agent manufacturer.
Options for equipment		
Mounting frame		
Mounting frame		Stainless steel installation frame for flush or surface installation of the cold-warm
		panel.
Mounting frame		Stainless steel installation frame for flush-mounted or surface-mounted installation
		of the cold-warm panel and for direct mounting of a Hupfer thermal bridge.
Heated/Light Gantry		
Design		
Horizon 1		Top frame made of closed sheet metal profiles with 90° angled glass pane 450/100
