

Cleanroom solutions

We make work flow

Founded in 1870 in Zeitz, Saxony-Anhalt, Hupfer is today one of the experts in the field of commercial kitchens and sterile goods logistics, as well as for the general transport of goods in care facilities (especially in connection with AWT/FTS systems).

Hupfer has been producing quality Made in Germany in Coesfeld, Westphalia, for more than 40 years. More than 550 employees in the headquarters and in the numerous, international subsidiaries characterise the face of the Hupfer brand worldwide.

From development to delivery, they build every product using their expertise and craftsmanship, ensuring Hupfer quality right down to the finest detail.

With our products and system solutions, we **optimise work processes, improve work safety and ease of cleaning** and thus achieve the highest standards of hygiene.

From medical to cleanroom

Our wide range of products made of **high-quality stainless steel** has also been used in cleanrooms for years.

Our customers know that they can rely on us - guaranteed! We are not only certified to **DIN EN ISO 9001**, but also to **DIN EN ISO 13485** as a manufacturer of medical devices. Strict monitoring of all process chains ensures the highest standards of quality management and maximises transparency and safety.

No two projects are the same. With our **customised system solutions**, we meet the individual requirements of our customers and thus ensure **the highest possible level of customer satisfaction**.

Discover the possibilities within our MediFurn® product range, among others. Get in touch with us!

CLEANROOM USE CASE

Cleanroom logistics

Hupfer is involved from delivery to testing and storage.

Here we go: The pallet transport cart is used to pick up the delivered products. The special dimensions enable practical transport in the lift. The four-sided impact protection is specially adapted to the plinth height provided by the customer.

"We can serve a wide range of cleanroom classes with our products."

Dieter Althoff, Hupfer Key Account Manager

Well packaged: The closed transport container can hold up to 24 polymer trays. The container is optimised for automated goods transport (AWT).

Great climate: The specially embossed gills ensure optimum air circulation and reduce moisture when stored in cold storage.

Practical: Holders for accompanying documents are installed outside and inside the container.

"Tailor-made solutions enable us to optimise processes for individual customers."

Dieter Althoff, Hupfer Key Account Manager

Customised: The inspection tables with adjustable working height and black and white inspection surface are customised Hupfer products.

Attention to detail: The work tables with practical belly cut-out and height-adjustable work lights.

Thought along: The table pull-out is optimised to hold the polymer trays.

Ergonomically valuable: Infinitely height-adjustable work tables for an optimum working position.
