The swivel castor with brake is used for mounting on mobile devices. The swivel castor with brake enables the mobility, steerability, and controllability of the devices.

The easy-running swivel castor with brake, made of high-quality plastic and metal parts from galvanised steel, is corrosion-resistant and is designed for attachment to mobile devices. The Hupfer swivel castor ensures the mobility of mobile devices. The effortless turning, steering, and positioning of the devices using the swivel castors increase efficiency and safety when carrying out tasks in tight or crowded work areas. The robust swivel castor is equipped with a swivel bearing with a double ball race and allows for easy handling of the devices, even with heavy loads. The ball bearing and thread protection enable almost silent and smooth mobility. The brakes secure and stabilise the position of the device. The swivel castor is securely mounted to the device using a back hole, ensuring stability.
