гарантируется.*

The sliding shelf is used for storage with maximum space utilisation. The shelf is movable on ceiling tracks. Depending on the model, the shelf is suitable for continuous use at ambient temperatures from -40°C to +60°C. The supports serve as the storage surface.

The Hupfer sliding shelf offers a clear and easily accessible storage solution for order in your logistics with maximum space utilisation. Its modular and movable design allows for specific configurations for different conditions and ensures the highest space efficiency. Thanks to the shelf's mobility via a guide using ceiling rails and rollers on the shelf uprights, you can create up to 100% more shelf space than with a standalone shelf. The ceiling rails are screwed to the ceiling. The ceiling guide ensures appropriate ground clearance when cleaning the premises. You can freely choose the individual components of the shelf according to your needs, in accordance with our Hupfer standard shelves of the standard series. The effortlessly hung shelves provide, depending on the series, a secure, well-ventilated, and easy-to-clean surface that can support high loads. The materials used are sustainable, 100% recyclable, and so valuable that Hupfer guarantees to buy back your entire shelf at the end of its service life.
