Глубина:	120 мм
Высота:	238 мм

Показан пример без декоративных элементов, точность технического описания не гарантируется.

Soap and disinfectant dispenser made from high-quality stainless steel in a hygienic design for wall mounting, universally applicable for bottles with a pump device in standard shapes and sizes.

Robust construction consisting of matt polished housing and a stainless steel retaining bracket for wall mounting. Housing pushed down from above via the wall bracket, with a backsplash on three sides and a flexible retaining clip on the front, suitable for a rectangular or round disposable or reusable bottle with pump device and filled with liquid soap, hand-washing lotion or disinfectant.

Dosage lever, bow-shaped on the top, universally height adjustable with an upper panel made of stainless steel sheet for particularly hygienic operation by elbow, avoiding hand contact.
