

Stationary shelving set norm 12 with solid shelf

Технические характеристики изделия N12GS21005001800 | RS-N12-GS/2100×500×1800

Технические характеристики

Max. bay load	100
Max. section load	600
Масса:	36.336 кг
Ширина:	2075 мм
Глубина:	500 мм
Высота:	1800 мм

Показан пример без декоративных элементов, точность технического описания не гарантируется.

The stationary shelving is designed for storage and to optimise space utilisation. The shelving has a high load capacity and is suitable for use at an ambient temperature of -30°C. The solid shelf, made from polymer, of the shelving norm 12 provides a lightweight, stable and hygienic storage surface.

The Hupfer Norm 12 stationary shelving is a lightweight structure made from a combination of aluminium and polymer. The shelving offers a very easy to clean, clearly arranged and easily accessible storage solution for organised logistics.

The modular design allows for a needs-specific layout for a wide variety of spatial and temperature conditions, thereby ensuring the most efficient use of space. Uneven floors and temperatures from -30°C are no problem, even on a permanent basis. The shelving is easy to assemble and can be extended at any time in a straight line or even around corners and is easily adapted to changes in everyday logistics.

The easy-to-install, solid polymer shelf provides a lightweight, stable and very easy to clean shelf surface. It is even dishwasher safe. This shelf holds heavy loads despite its light weight.

The materials used are sustainable, 100% recyclable, and so valuable that Hupfer guarantees that it will buy back all of your shelving at the end of its useful life.

- solid polymer shelf with low weight ensures safe, hygienic storage and clear

*Технические характеристики изделия N12GS21005001800 | RS-N12-
GS/2100x500x1800*

- access at all times
- high-quality polymer workmanship allows for easy cleaning and perfect hygiene. It is even dishwasher safe.
- modular system allows for any design and extension and ensures the most efficient use of space
- valuable materials ensure sustainability and value retention
- robust construction guarantees high stability and high load-bearing capacity
- modular system ensures easy handling from assembly to cleaning with little effort
