

## Stationary shelving set norm 35 with solid shelf

Технические характеристики изделия N35GS29006101800 | RS-N35-GS/2900×610×1800

### Технические характеристики

<b>Max. bay load</b>	250
<b>Max. section load</b>	2000
<b>Carbon footprint TM65</b>	1140 kgCO <sub>2</sub> e
<b>Масса:</b>	112.954 кг
<b>Ширина:</b>	2850 мм
<b>Глубина:</b>	610 мм
<b>Высота:</b>	1800 мм

The stationary shelving is designed for storage and to optimise space utilisation. The shelving has a particularly high load capacity and is suitable for continuous use at ambient temperatures ranging from -40°C to +60°C. The solid shelf of the shelving norm 35 provides a stable and hygienic storage surface.

The Hupfer Norm 35 stationary shelving offers a clearly arranged storage solution that has been reinforced to offer high load-bearing capacities for organised logistics.

The modular design allows for a needs-specific layout for a wide variety of spatial and temperature conditions, thereby ensuring the most efficient use of space. Uneven floors and temperatures from -40°C up to +60°C are no problem, even on a permanent basis. The shelving is easy to assemble and can be extended at any time in a straight line or even around corners and is easily adapted to changes in everyday logistics.

The solid shelf, which can be hooked in effortlessly, is made from high-quality stainless steel and provides a stable and easy-to-clean storage surface while also offering particularly high load capacities.

The materials used are sustainable, 100% recyclable, and so valuable that Hupfer guarantees that it will buy back all of your shelving at the end of its useful life.

- lateral bracing bars also reinforce the shelving and allow for particularly high load-bearing capacities

**HUPFER**  
we make work flow

*Технические характеристики изделия N35GS29006101800 | RS-N35-  
GS/2900×610×1800*

- solid shelf ensures safe, hygienic storage and clear access at all times
- high-quality stainless steel workmanship enables easy cleaning and perfect hygiene
- modular system allows for any design and extension and ensures the most efficient use of space
- valuable materials ensure sustainability and value retention
- robust construction guarantees high stability and particularly high load-bearing capacity
- modular system ensures easy handling from assembly to cleaning with little effort
